PRP AFTER CARE

You may experience some mild soreness and swelling to the scalp for a few days.

It will take approximately 5 days to heal from microneedling. DO NOT pick the scabs.

Avoid taking anti-inflammatory medications (Ibuprofen, Motrin, Aleve, Naproxen) for 5-7 days after treatment as these will decrease the collagen response. You may take Tylenol 1000 mg every 8 hours as needed for pain.

Avoid alcohol and smoking for 3 days after treatment.

If you have any questions or concerns please feel free to call (561) 296-5222.
